

## **TECHNICAL DATA**

# Divinycell HT

## THE HIGH PERFORMANCE SANDWICH CORE

Divinycell HT is an aerospace core available with comprehensive quality documentation and traceability.

Diviniycell HT foam is suitable for pre-preg processing (typical +120°C) as well as wet resin systems and infusion. Furthermore Divinycell HT is also self-extinguishing according to FAR 25.853. Divinycell HT eliminates edge potting and sweep and sand.

## **MECHANICAL PROPERTIES**

Density	ASTM D 1622	kg/m³	Nominal	65	80	100	130	250

All values measured at +23°C

Nominal value is an average value of a mechanical property at a nominal density Minimum value is a minimum guaranteed mechanical property a material has independently of density

## **PRODUCT CHARACTERISTICS**

- High dimensional stability
- High strength and stiffness to weight ratio
- Good temperature resistance
- · Low water absorption
- Non biodegradable
- Easily machined and processed
- Excellent chemical resistance
- · Acoustic and thermal insulation
- · Low resin uptake
- Consistant and homogenous

## **APPLICATION AREAS**

Primary structures, radomes, control surfaces and interior components.

#### 1. Typical values

Normally Divinycell HT can be processed at up to  $\pm 145^{\circ}$ C with minor dimensional changes. The foam can be used in sandwich structures, for outdoor exposure, with external skin temperatures up to  $\pm 100^{\circ}$ C.

Maximum processing temperature is dependent on time, pressure and process conditions. To confirm that Divinycell HP is compatible with users particular processing parameters, and for optimal design of applications used in high operating temperatures in combination with continuous load, please contact Diab Technical Services.
