Divinycell PL

HIGH PERFORMANCE RECYCLABLE PET SANDWICH CORE WITH ULTRA-LOW RESIN ABSORPTION

Divinycell PL is fully recyclable and has been developed with the aim of optimising PET cored composite structures. Divinycell PL provides superior shear strength and ultra-low resin absorption, helping customers achieve weight reduction and overall cost reduction of components without surface sealing treatment, while ensuring reliable and strong peel strength.

With its superior shear strain and temperature performances, Divinycell PL is suitable for a variety of processes such as vacuum infusion, pre-preg and hot-press moulding. Divinycell PL230 is particularly suited for high strength demand, and application like local inserts, providing very good screw retention.

1. All values measured at +23°C. Testing is done on foam with welding lines.

2. Properties measured perpendicular to the plane

3. Properties measured parallel to the welding lines, 1-3 direction

4. Shear properties measured perpendicular to weldlines, 2-3 direction

Nominal value is an average value of a mechanical property at a nominal density.

Minimum value is a minimum guaranteed mechanical property a material has independently of density.
