Divinycell P

THE HIGH PERFORMANCE FST SANDWICH CORE

Divinycell P is a closed-cell PET structural core with excellent fire, smoke and toxicity behavior. It is thermoplastic and recyclable, offering good mechanical properties, high chemical resistance and does not absorb water. Divinycell P is ideal but not limited to applications requiring demanding FST properties like public transport, architecture or commercial marine.

Due to its good dimensional stability at elevated temperatures, Divinycell P can be processed with medium temperature pre-prep systems and it is compatible with most commonly used resin and manufacturing systems. Divinycell P is easy to thermoform, cut or mill.
